

Vintage

Felix Rian Constantinescu

to Bunyan

Internet chokes in it there are vintage guitars photocameras matchboxes purses jewelry and books
And all good for nothing for instance a Praktica on film without objective or an English manual 1953
But it has the stamp Vintage so they let them go like a fat chordless piano on the road for some
snubs

Who made garbage selling a business everything without use or point gets muffled there for
commerce

Even this letters have the mark Vintage like they are obsolete good for nothing maimed Latin though
Honestly I recognize three writs Fatherly Hebrew homemade Greek and perfect Latin the cross play
INRI + as for all shit selling things like silver coins greedy stamps or unearned military decorations
Let them be they're Herod's and to Herod they will go with all their vintage life in a real Inferno.
