

The Stream

Felix Rian Constantinescu

A stream engulfs our world like Ireland Iceland Groenland
To pass it you have to walk on the mountains of water
We are a pair of locusts sitting by this written leaf +
Freedom is a Gift not a self help realization I think
I made Antarctica more clearly no I must take medicine
So I will end soon it was an honor to be contemporary
Though I recommend to carefully read the Biblia for the
Flight we all have a cold stream to pass and pass it we shall
I want to see you again young and happy and saved.
